J. MÜLLER

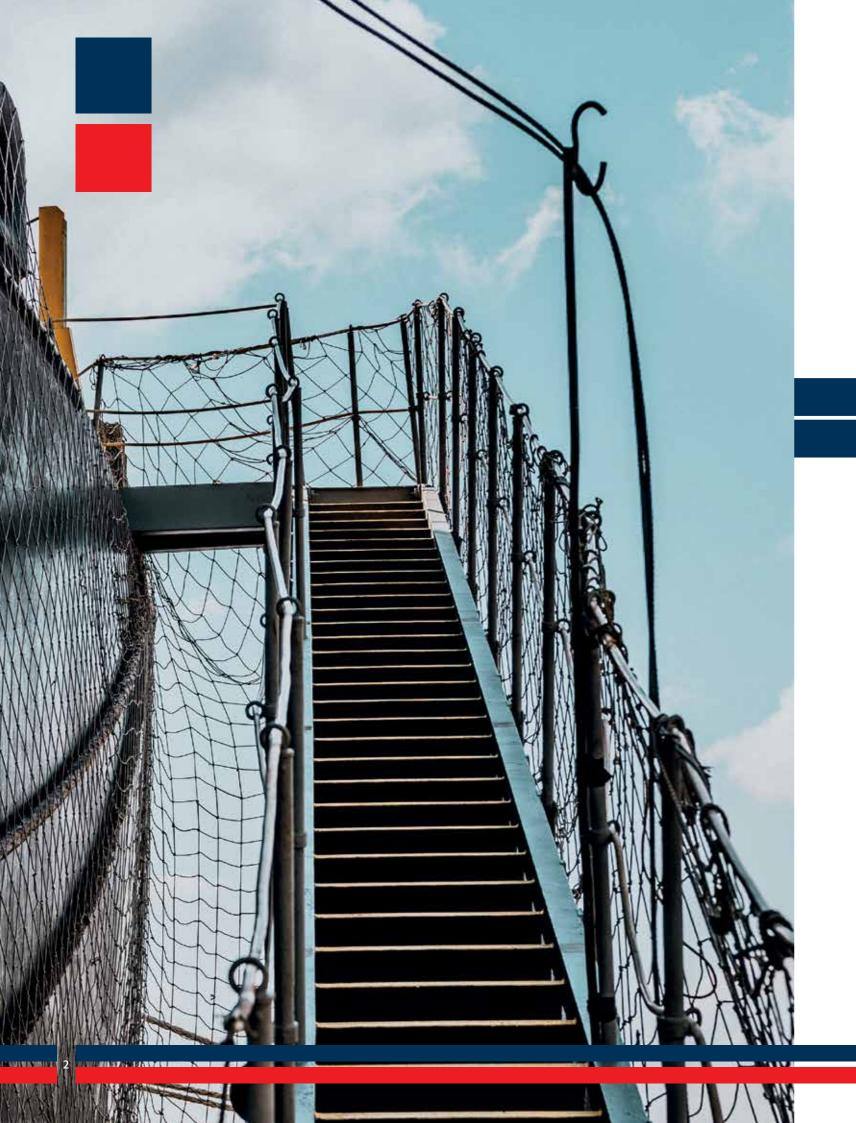

LIVING THE CHANGE, PRESERVING VALUES

Tradition and innovation are two sides of the same coin. Every innovation first has to prove itself, be found successful over the course of the years and enhanced before it finally becomes a good tradition. This awareness has been the basis of all our actions for around 200 years now.

J. MÜLLER is meanwhile a byword for an enormous variety of highly specialised services that cover all aspects of the port and logistics business. Our operating company, J. MÜLLER Weser GmbH & Co. KG, works under the umbrella of a medium-sized, family run public limited company and has built up a comprehensive service portfolio to implement the product and market strategies of the J. MÜLLER Group.

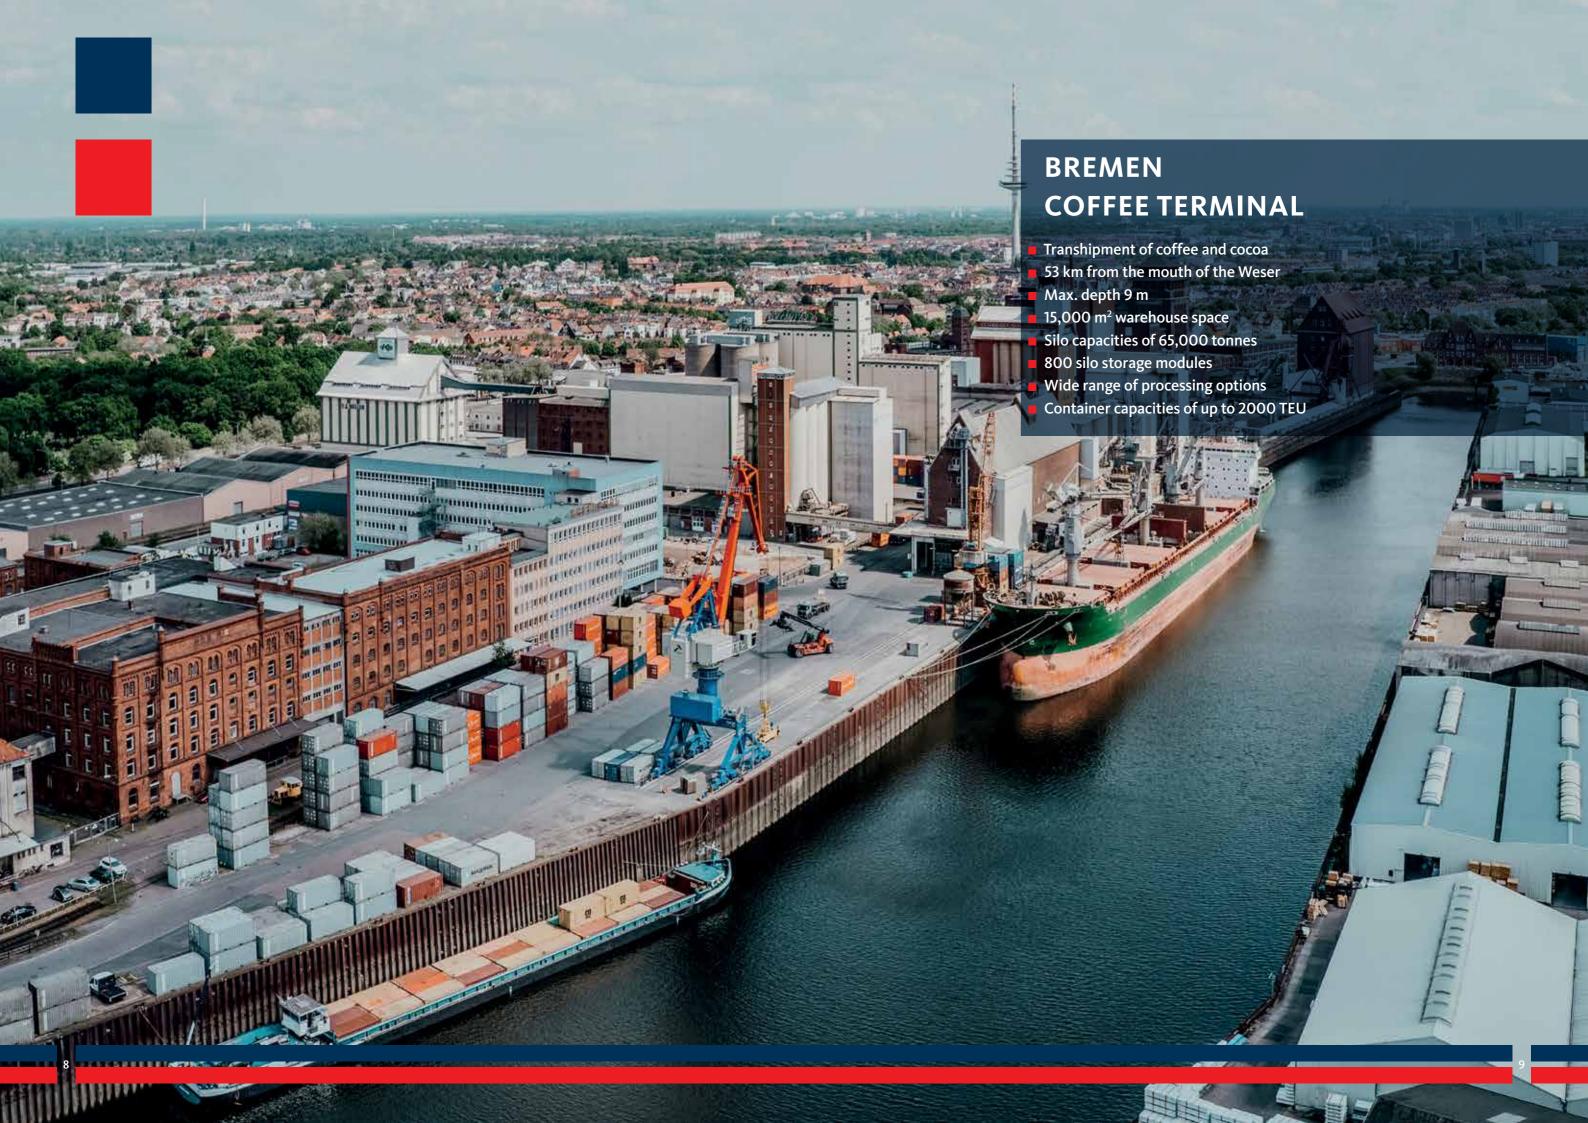

From grain and feedstuffs to forest products, from coffee to iron and steel, from wind turbines to marine proteins – whenever special services are required, you can count on us. We take care of your entire logistics requirements, such as handling, storage, processing and distribution, as a one-stop shop. Focussing consistently on the customer's requirements, we work flexibly, sustainably and rationally, constantly meeting the most stringent quality standards using state-of-the-art equipment. Our corporate policy revolves around the core idea of customer service.

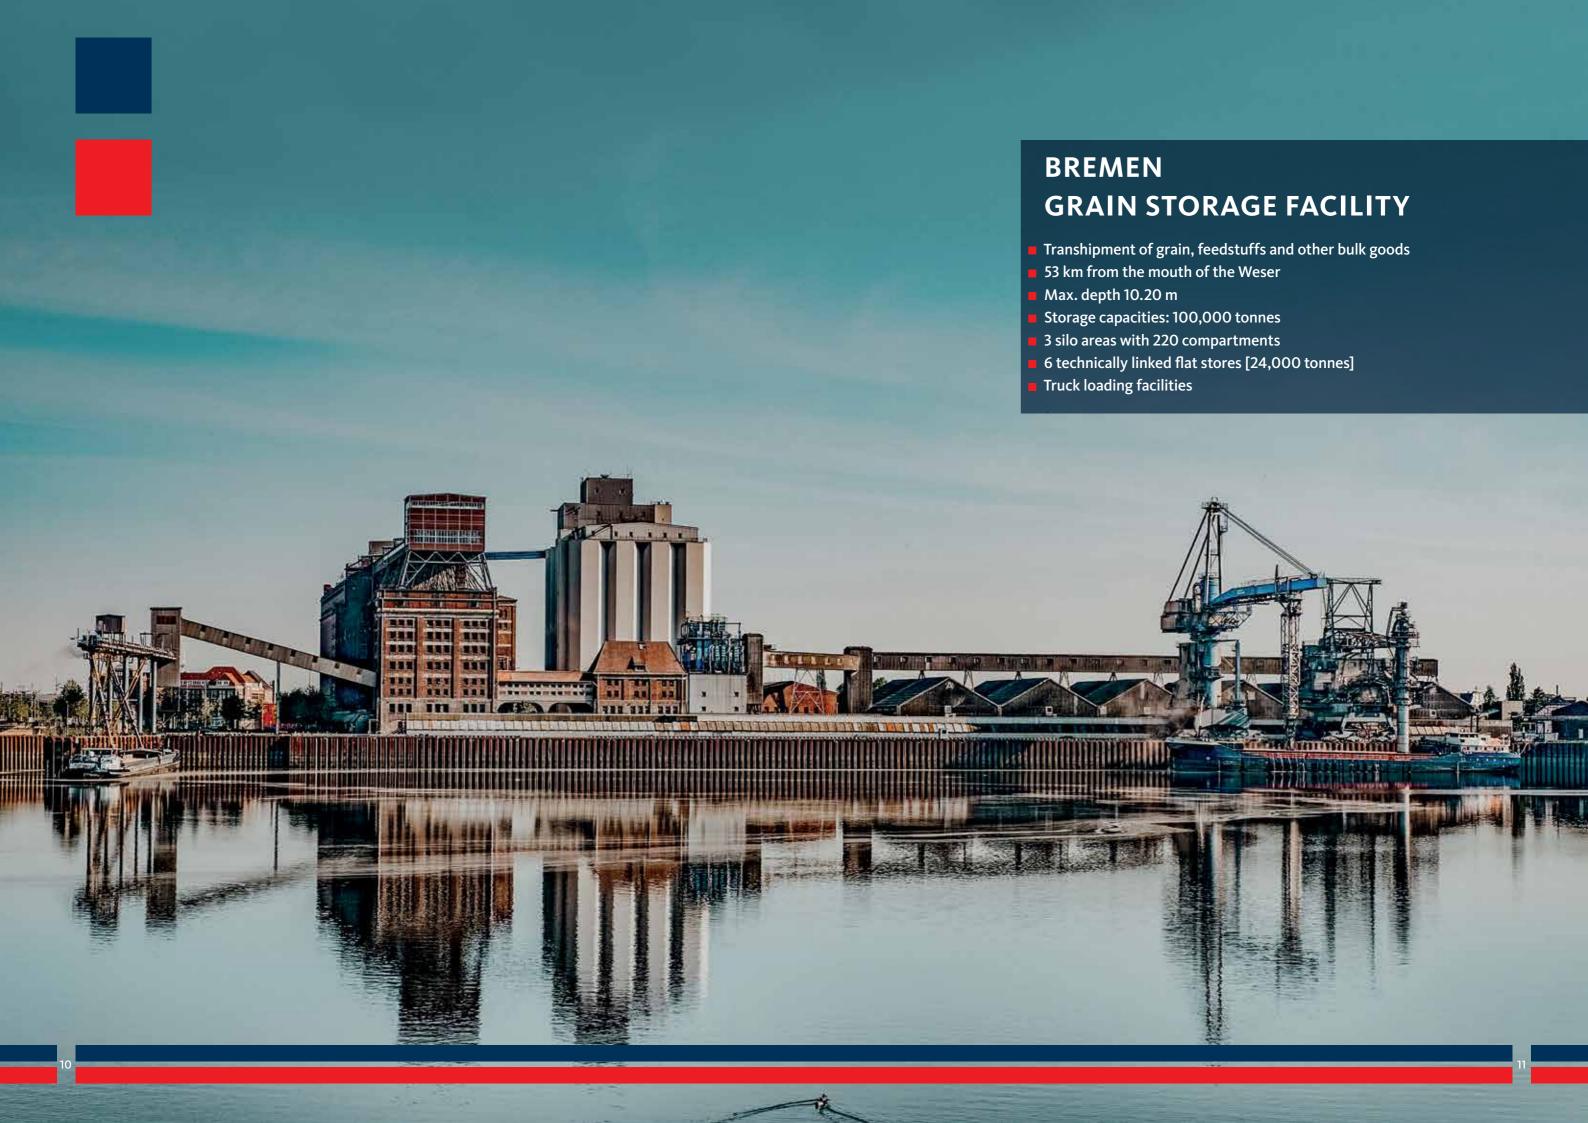

All of the above has made us the most efficient port terminal operator on the Lower Weser.

Jan Müller, Chief Executive Officer of J. MÜLLER AG

AGRICULTURAL PRODUCTS

LOCATION: The seaport of Brake is located at the intersection of international agricultural logistics flows and in the direct vicinity of the north-western German compound feed industry, making us the ideal partner for handling your grain and feedstuffs. The grain storage facility in Bremen provides substantial additional capacities.

CAPACITIES: We have the largest coherent silo facility in Europe and can discharge 20,000 tonnes of agricultural goods a day. Our storage facilities in Brake and Bremen can hold a total of more than Good reason for you to entrust us with 650,000 tonnes. Modern self-service stations mean that goods can be collected at any time.

ACCESSIBILITY: Trimodal transport connections [road, rail, water] guarantee flexibility and customised solutions for agricultural transports.

PROCESSING: Our comprehensive services, each of which can be ordered individually, include product treatment, i.e. dehydration, aspiration, crushing, milling and shredding. We offer separate handling and storage of GM-free and organic products, fertilisers and feed additives.

handling four million tonnes of agricultural products every year.

COFFEE

EXPERTISE: We have more than 50 years of experience of green coffee logistics and are a major partner for the coffee industry in Germany and other European countries. In Bremen, we have of more than 90,000 tonnes. Our trimodal container terminal at the Hansakai pier is linked to numerous European container ports via rail, inland waterway or road. We are also a certified bonded warehouse for ICE Futures Europe [Robusta] and ICE Futures U.S. [Arabica].

SERVICES: Our portfolio ranges from transhipment, quality control and sampling to specialist storage, processing and packaging right through to transport of the coffee to its destination. On request, we also clean and blend the different

green coffees in accordance with your individual instructions. We are also happy to attend to documentation and customs clearance via ATLAS as well as container tracking. For upstream and modern silo handling facilities and storage capacities downstream logistics and distribution requirements, we either use our own fleet [B-LOG] or cooperate with efficient partner companies.

> Storage, cleaning and blending, warehouse and transport logistics as well as diverse services: your coffee is our prime concern.

FOREST PRODUCTS

Brake has covered storage areas for pulp, paper and other forest products. With a throughput of more than one million tonnes, we are the largest cellulose import location in Germany. Excellent rail connections ensure that most destinations in Europe with a rail siding can be reached within 48 hours.

EXPERIENCE: Because we have specialised in handling pulp and paper for around 50 years, we pay particular attention to the correct storage and treatment of each individual type of product. Large parts of our premises, for example, are fitted with a floor covering designed specifically for the storage of paper.

LOCATION ADVANTAGE: Our seaport terminal in EXPERTISE: Our product and transport competence also benefits many other areas. As part of our Cargo Care service package, for instance, we inspect the quality of your goods and also attend to any damage that has occurred. In addition to numerous ancillary services such as container stuffing and stripping, we can also organise transport to and from the port for you.

> Pulp, paper, round and sawn timber, wood materials: we can always see the wood for the trees.

IRON AND STEEL

LOCATION: We have invested substantial sums to make Niedersachsenkai in Brake a flagship terminal on the German coast. With a 450-metre long quay, state-of-the-art crane equipment, a total site potential of 500,000 m² and trimodal transport connections to the European hinterland, we are one of the premium transhipment locations for the iron and steel market.

EQUIPMENT. Whether heavy plate or large pipes, coils or slabs, sheet piling, special wire products or steel girders, we have the right equipment to handle all these goods.

EXPERIENCE: Decades of expertise in the iron and steel sector ensure that we are a customerdriven, efficient partner for the steel market. Our extensive covered and outdoor storage areas are suitable for a wide variety of uses, such as prefabrication, consolidation or distribution.

Whether coils, sheets or pipes: we are wired for efficiency.

WIND POWER

HIGH-POWERED: The seaport of Brake has evolved into one of the leading hubs of the global wind energy industry. Over the last decade, we have transhipped several thousand wind turbines at the terminal. The total output of these turbines is almost equal to the energy generated by four nuclear power stations.

SPECIALISTS: The basis for this efficiency is Niedersachsenkai, which was inaugurated in 2009. It has specialist hoisting equipment and transport vehicles and extensive space for the storage, consolidation, assembly, maintenance and transhipment of all components. Clever logistics ensure that the required human resources, equipment and components are always at the right place at the right time throughout the port.

UNCOMPLICATED: Even when all the components have left our premises, you continue to benefit from the unbeatable advantage of our location, as there is no need for a police escort for the transport of your components by truck to and from Brake.

We know which way the wind blows.

BREAKBULK AND PROJECT CARGO

LOCATION: When it comes to project cargo and heavy lifts, the seaport of Brake is one of the leading transhipment hubs on the German North Sea coast. Extensive logistics areas provide ample space and our highly specialised equipment and heavy-lift cranes ensure fast and careful handling of a wide range of goods.

HANDLING: Whether heavy machinery, rolling stock, conventional general cargo or even complete industrial plants – we are experts when it comes to handling industrial goods, making us the ideal partner for this sector. We ensure correct transhipment, have comprehensive storage facilities and also attend to pre- and final assembly as well as maintenance work in cooperation with local craftsmen and service providers.

Entrust your heavy goods to our experienced hands.

OTHER GOODS

EXPERTISE: Sulphur, bulk, building materials or scrap – our skills are as varied as the raw materials we handle. We have modern equipment for the specialist treatment of all kinds of materials as well as extensive sites for interim storage. Thanks to highly efficient logistics, we have all project phases under control.

SCRAP: In Brake, we tranship new scrap from the automobile industry as well as Category E1 and E3 old scrap. Cranes with powerful motor grabs as well as special-purpose diggers and wheel loaders are available for fast handling.

BUILDING MATERIALS: Whether grit, granite, sand or gravel – Brake has sufficient water depths and extensive outdoor sites for optimum interim storage. The goods are handled using large-scale equipment such as shovel loaders and excavators. If necessary, all materials can be delivered to the consignee in trucks with special box dumpers.

BULK GOODS: Earth, sand, minerals and many other kinds of grab-handled cargo are increasingly transhipped at the seaport of Brake. In addition to our state-of-the-art bulk cargo shed, which has a capacity of 40,000 tonnes, there are further storage areas at the port. Efficient transport links by barge, truck and train ensure just-in-time delivery to the customer.

SULPHUR: The largest sulphur treatment and handling plant in Europe is located in Brake and means maximum flexibility for us. Liquid sulphur is taken into storage via pipeline from rail tank wagons into special tanks, transhipped into heated tanker vessels while still liquid or solidified and transferred to bulk carriers before it is shipped to destinations all over the globe.

We are the experts for goods of all kinds.

VALUE ADDED SERVICES

Our extensive covered and outdoor storage facilities in Brake and Bremen, combined with the expertise of specially trained staff, offer diverse options for making your transport logistics even more efficient. Our range of ancillary services includes, for example:

- Blending various kinds of green coffee in accordance with your individual requirements
- Shredding, milling, crushing, dehydration and aspiration of agricultural products
- Handling and storage of GM-free and certified organic agricultural products
- Container stripping and stuffing
- Use of our sites for the pre-assembly of plant components

Our modern inventory management system enables the extremely efficient organisation of all storage processes as well as all ancillary transport logistics services.

Maximum flexibility for your product – no matter what it requires.

20 21

TRANSPORT AND SERVICES

LOGISTICS: We can transport your goods to any requested national or international destination on the most economically efficient route thanks to the permanent availability of vast transport capacities. Our self-service stations for agricultural products mean that goods can be collected at any time.

B-LOG: Truck transports of GMP+-compliant agricultural products and bulk goods are no problem for us. Our truck joint venture B-LOG is designed to meet the needs of all players, from the agricultural trade and processing business to the compound feed industry, malting plants and farmers.

AGENCY SERVICES AND CHARTERING

AGENCY: We provide a full range of agency services for ships 24/7. Whether registration with the German authorities, ordering the necessary pilotage or towage services, supplying fuel oil, fresh water or provisions, disposal of shipboard waste or all services in connection with crew changes, we make sure that your vessel can set out for the next port of call at full speed.

CHARTERING: When it comes to inland waterway and ocean chartering, we have a resource that scores top marks: our extensive and excellent connections to the owners of barges and seagoing vessels. This gives us access to enormous transport capacities which in turn offer you maximum flexibility when it comes to departure frequencies and deliveries. Moreover, we operate our own high-performance private fleet which specialises in the transport of dry bulk, grains and feedstuffs as well as project cargo and breakbulk. Thanks to our joint venture Müller & Oorburg Logistics, we now operate on all European waterways.
